1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 3-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cameron. Cameron discloses a telescopic rod 10,12, two support members 14,16 having hook shaped limiting pieces 34,38 protruding therefrom.

The applicant states that Cameron does not teach at least one hook shaped limiting piece protruding upwardly from a top of an outer periphery of one of the two support members. This is not convincing for the enlarged part 34 and the annular bead 38 of Cameron define a curved surface which fully responds to the claimed hook inasmuch as a hook by definition is a curved device used to catch, suspend, or fasten something.

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
